

Handlamp LED Module H-79P

Product Overview

The LED Module H-79P for the Wolfite H-251A Rechargeable Handlamp improves the light output, giving approximately 50% more light, and extends the battery life by 17 hours from 7 hours to up to 24 hours.

Replacing the existing halogen bulb with the LED Module H-79P is quick and easy and will preclude the need for bulb changes in the future.

With a typical life of over 25,000 hours, the LED Module H-79P is expected to last the product lifetime, minimising product maintenance and eliminating the risk of light source failure.

Technical Specification

Product Reference	H-79P
Product Description	Handlamp LED Module for H-251A
