The Wolf Safety Lamp Company recognises that the activities that the organisation carries out developing, manufacturing and supplying equipment and protective systems intended for use in potentially explosive atmospheres, can result in environmental conditions being affected by those activities. It is also recognised that environmental conditions may be capable of affecting the organisation and those activities.

The Wolf Safety Lamp Company shall maintain an Environmental Management System (EMS), that satisfies the requirements of ISO 14001:2015 in order to achieve the environmental aims of this policy. The EMS shall be appropriate to the design, light-industrial manufacture and supply of products from the site in Sheffield, UK.

The Company shall determine environmental objectives, which will be monitored, measured and reviewed along with any issues identified relative to the context of the organisation, on an annual basis by the Management Team, to identify opportunities for improvements in environmental performance.

The Company commits to the protection of the environment, the prevention of pollution and to develop and supply robust and serviceable products that will provide a long, safe and useful service life.

The Company commits to identifying and complying with all relevant compliance obligations, including both legislative requirements and agreed customer needs.

The Wolf Safety Lamp Company continues its commitment to continually improve the Environmental Management System in order to enhance the environmental performance.

The Directors have undertaken to provide the resources needed to achieve the Company's environmental aims.

Signed for and on behalf of
The Wolf Safety Lamp Company Limited

A.W.M Jackson – Managing Director
